## JAVIER LARRAÑETA

*Member of the Executive Board at ETPIS (European ETP Initiative on Industrial Safety)*

---

Mr. Larrañeta obtained a technical degree in Physics (electronics and automation) and further education in ICT, Human Resources Management & Training, OSH and Security Management. He has 35 years of experience as Entrepreneur and consultant, with an extensive background on business innovation and technology development (R&D strategies). He's designed several programmes for regional Governments and Entrepreneur associations encouraging the effective introduction of the new technologies in SME and different business sectors, with a special focus on the human and organizational factors developing advanced multimedia training materials and e-learning. During the last 10 years has been managing PESI the Spanish Technology Platform on Industrial Safety & Security, actually as the Secretary General. PESI members include the most important Corporations (Iberdrola, REPSOL, Gas Natural, Ferrovial...) with specialized Engineering and Consultancy firms so as the most active Research Institutes and Universities. In PESI has defined the strategy and structure of the different working groups (safety and reliability under industry 4.0, security and resilience, nano-safety and safety culture among others). Related to the human and organizational factors he has promoted focused groups in: prevention strategies, road safety at work and drugs at workplace. He's elected member of the Executive Board at ETPIS (European ETP Initiative on Industrial Safety) and member of the International Advisory Board of SAFERA (ERAnet on Industrial Safety). In October 2016 organized the first S2RForum Congress on safety & security research in Europe. Actually he is also senior advisor at TECNALIA Research & Innovation (biggest private research center in Spain) in the areas of Safety, Security and the Protection of Critical Infrastructures so as invited speaker on these topics in several workshops and congresses
