JORG NIMOTH

Head of Global Ergonomics Rollout Project, Continental AG

Dipl.- Ing. (FH) Jörg Nimoth, a mechanical design engineer with additional skills in work study, has been working for several different business units and divisions of Continental AG since 1989. He started as an industrial engineer, then he worked for more than 20 years as a human relations manager as well as head of plant human relations at several Continental AG production facilities. Since 2015 he has been the Head of Global Ergonomics Rollout Project for Continental AG. He is responsible for safeguarding an international ergonomics standard at shop floor workplaces within the corporation as well as for building-up, maintaining and enhancing ergonomics competences. As a part of the Continental AG Corporate Safety & Health department, one of the core tasks is to lead and steer the Corporate Ergonomics International Network. Due to the implementation project of a corporate standard knowledge base in ergonomics and a special designed software tool for ergonomics risk assessment Continental AG ensures a corporate wide common understanding of ergonomics. Continental AG promotes this common “Ergonomics Alphabet” within the community of all plant ergonomics teams as a special key and driver to a high quality experience exchange between all Continental AG locations around the globe.
